EXPERIENCE

- Experienced in building dynamic and responsive user interfaces using React and Next.js.
- Confident in writing clean, maintainable JavaScript code that follows industry best practices.
- Proficient in managing application state using Redux, Zustand, and the React Context API.
- Well-versed in integrating RESTful APIs and handling asynchronous operations smoothly.
- Skilled at debugging and optimizing front-end applications for performance and usability.
- Actively working on both frontend and backend APIs, delivering fullstack solutions with clean architecture.

EDUCATION

Web Development Training at Picsart Academy January 2023 – September 2024 (1 year 8 months)

Gained a solid foundation in computer programming, including proficiency in C and understanding of computer architecture principles. Completed the Professional JavaScript Course, mastering key concepts and best practices. Gained expertise in Node.js, Express.js, and Linux, enhancing my backend development skills. Advanced my knowledge in front-end development, focusing on front-end frameworks and completing numerous projects.

Bachelor's Degree in Information Technology

European University of Armenia
